**37 C.F.R. § 1.121(b)(iii) AND (c)(ii)**

**CLAIMS:**

3. A classifier as claimed in claim 2 wherein said array of inclined plates comprises an array of parallel equally spaced plates extending across said fluidization chamber.

5. A classifier according to [any one of claims 2 to 4] claim 2 wherein two or more arrays of inclined plates are provided, each array being vertically spaced from the or each other array, and dividing the fluidization chamber into zones.

7. A classifier as claimed in [any one of claims 2 to 6] claim 2 wherein a feed fluid incorporating particles to be classified is fed into the fluidization chamber between two said arrays of inclined plates.

8. A classifier as claimed in [any one of claims 1 to 6] claim 1 wherein the particles are fed into the fluidization chamber with the fluidization fluid.

11. A method as claimed in [either claim 9 or claim 10] claim 9 wherein said fluidized bed is provided with fluidization fluid at a predetermined rate so as to achieve desired separation of sizes or densities above and below said inclined plates, in combination with selected sizes, inclination and spacings of said inclined plates.
